

Google Gemini Hackathon

Date: 2024.07 1 mon
Tools: Figma
Contribution: UI 100% UX 40% Prototype 100%

Starting from a working prototype built by a senior, I redesigned the UX flow so learners can move seamlessly from AI-powered recommendations to note search and practice test creation. I standardized the color/typography system and applied accessibility (contrast, focus order, labels). In a pilot test (n=3), users completed all core tasks successfully (100%).
